Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)					
	10/789,464	ARSHINOFF, STEPHEN H.					
Office Action Summary	Examiner	Art Unit					
<u> </u>	Robin A. Hylton	3781					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1) Responsive to communication(s) filed of	on <u>28 <i>February 2007</i></u> .						
2a) This action is FINAL . 2b)							
3) Since this application is in condition for	allowance except for formal mat	ters, prosecution as to the merits is					
closed in accordance with the practice	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims							
4) Claim(s) 1-6 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-6 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.							
Application Papers

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 28, 2007 has been entered.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "the radial beads predisposing strain creases to form in an even pattern coincident with said radial beads in a direction towards said lid perimeter".

Claim Rejections - 35 USC § 112

3. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the disclosure as originally filed for the radial beads predisposing strain creases to form in an even pattern coincident with said radial beads "in a direction towards said lid perimeter". The disclosure only sets forth the "creases 440 have formed partially coincident with the beads 450" (paragraph 015). This is a **new matter** rejection.

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 3781

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Oblak (US 5,685,449).

Oblak discloses a sealed container comprising: a (metal) container body 12 having an open top and a removable lid 10 covering the open top of said container body and being crimped to said container body about the periphery of said lid, said lid comprising a plurality of generally evenly spaced, elongate radial beads 46 extending from adjacent the center of said lid to adjacent a position spaced apart from the perimeter of said lid, said radial beads predisposing strain creases to form in an even pattern coincident with said radial beads in a direction towards said lid perimeter when a pressure differential develops across said lid.

See column 6, lines 46-51 which states "when the lid is subjected to increases in internal pressure within the materials container, illustrated by arrows 48 in FIG. 6, wrinkles 47 (FIGS. 3 and 4) are formed in the central body portion of the lid. The wrinkles tend to intersect the sacrificial depressions 46 which are weaker and thus more susceptible to deformation." This indicates the creases are formed in a direction toward the perimeter of the lid. Thus, anticipating the claims.

Claim Rejections - 35 USC § 103

Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oblak.

Wherein it can be argued Oblak teaches the claimed lid except is silent regarding stamping of the beads, it would have been obvious to one of ordinary skill in the art at the time the invention was made to form the lid including the beads by stamping since the examiner takes Official notice that it is well established in the closure art to form a metal lid by a stamping operation.

Application/Control Number: 10/789,464

Art Unit: 3781

It is noted that this previously set forth common knowledge or well-known in the art statement is taken to be admitted prior art because applicant either failed to traverse the examiner's assertion of official notice or that the traverse was inadequate.

Response to Arguments

7. Applicant's arguments filed February 28, 2007 have been fully considered but they are not persuasive.

Applicant's arguments regarding the patent to Oblak are not persuasive for the reasons set forth in the rejections above. The rejection under 35 USC 112, first paragraph notwithstanding, the claims are anticipated by Oblak. The patent teaches the depressions, or beads, can be formed in any shape (column 6, 40-43). Additionally, the beads are spaced at a location from the center of the center of the lid and from the perimeter of the lid, wherein the perimeter as set forth in the instant claims contain the crimping. As noted above, the sacrificial depressions cause the creases formed by increased pressure within the container to align therewith so the container remains sealed. Thus, the structure of Oblak anticipates the instant claims.

Conclusion

8. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any

Art Unit: 3781

amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various prior art closures teaching features similar to those disclosed and/or claimed are cited for their disclosures.
- 10. In order to reduce pendency and avoid potential delays, Group 3720/80 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.
- 11. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for	Application Serial No	is being facsimiled to
The U.S. Patent and Trademark Office via fax numb		late shown below:

Typed or printed name of person signing this certificate					
Signature					
Date					

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robin Hylton whose telephone number is (571) 272-4540. The examiner can normally be reached Monday - Friday from 9:00 a.m. to 4:00 p.m. (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Stashick, can be reached on (571) 272-4561.

Any inquiry of a general nature or relating to the status of this application or proceeding

Art Unit: 3781

may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Other helpful telephone numbers are listed for applicant's benefit:
